

Waiting On Forever

Granger Smith

There's a picture on the table, that I look at all the time
You and me, a destiny, back then when you were mine
That night I can remember the words I heard you say
And I believed eternity was not too far away

You said that you and me together, we'll stay like that forever
And no one else could ever take my place
Now I've lost track of time since you left me far behind
And the teardrops keep rolling down my face
You said that you would need me, and love me 'till the end...
Now I'm still waiting on forever to begin

The only thing that I can do is give it all some time
My mind won't let me forget this broken heart of mine
And I'm still holding every word that I believe was true
You said our future's clear and bright but all I see is blue

You said that you and me together, we'll stay like that forever
And no one else, could ever take my place
Now I've lost track of time since you left me far behind
And the teardrops keep rolling down my face
You said that you would need me, and love me 'till the end...
Now I'm still waiting on forever to begin

You said that you and me together, we'll stay like that forever
And no one else could ever take my place
Now I've lost track of time since you left me far behind
And the teardrops keep rolling down my face
You said that you would need me, and love me 'till the end...
Now I'm still waiting on forever to begin
And I'm still waiting on forever, if not we'll still be together...
I'm waiting on forever to begin
