

# What War Left Behind

Grave Digger

Dark clouds - have gone  
Like my hope  
My fear - dwells on  
From the past

My destiny died  
That is my belief  
And all men lied  
Attempt to deceive

Everything turns to black  
God made me, they said  
I will never come back  
I lay down my head

What war left behind  
The legacy of mankind  
What war left behind  
Forgotten and out of mind

What war left behind  
The legacy of mankind  
What war left behind  
Forgotten and out of mind

My heart - my soul  
Is turning black  
No tears - no cry  
My mouth is dead

Sorrow remains  
The circle of life succeeding pains  
This is the world I hate  
The meaning of life is war we create

Everything turns to black  
God made me, they said  
I will never come back  
I lay down my head

What war left behind  
The legacy of mankind  
What war left behind  
Forgotten and out of mind

What war left behind  
The legacy of mankind  
What war left behind  
Forgotten and out of mind

What war left behind  
The legacy of mankind  
What war left behind  
Forgotten and out of mind

What war left behind  
The legacy of mankind

What war left behind  
Forgotten and out of mind
