Bright Lights

Graveyard

I know that face too well
I've seen it coming this way
I saw it coming back to you
How did you get so pure?
I'm just like a loving black hole
Down here, the colors faded so long ago

I know sometimes I go too fast
Another way, a different path
This place is so unreal

How did we get to this?
My head's just faded old songs
I'm out here in the sun with you
I'm just like rain in the cold
I should be grateful, I know
So sick and quiet, people screaming out loud

Someday the sun will reach to you
It's my decay, it's not for you
It's just a stop along the road
Well, just one more to fill the hole
Someday soon I hope you're right

I've been waiting for so long
Don't see what takes you down and still I wait around
It takes you by your hand, takes you all the way
All the way home

I see you lost your way again
The shade of gray, it's turning dark
In my dilapidated world
One day I'll see you too

I've been waiting for so long
Don't see what takes you down and still I wait around
It takes you by your hand, takes you all the way
All the way home
