

## Cause & Defect

Graveyard

It was a light rain that fell  
It fell heavy on our heads that day  
Benny wasn't even there to see it go down  
Maybe he knew they wouldn't let him stay

It's cause and defect

We all saw the dark clouds coming  
That's when he painted the basement blue  
He stepped right out took a step closer to dying  
Two steps more without even trying

It's cause and defect

It's like climbing a dream  
Tumbling down a failure  
Trippin' on a nightmare  
To see that no one is there no one is there

No matter no matter their motives  
The consequences are the same  
Predictable systems with no one to blame  
Wisdom of experience nowhere to be found

It's like climbing a dream  
Tumbling down a failure  
Trippin' on a nightmare  
To see that no one is there no one is there
