

Twilight (My Heaven)

Grayscale

I'm like a steel train coming off
Crash to the floor just about erupt
You're like my cocaine wearing off
Start going dark, yeah but it's just enough

I think I want to think about us and I
I think I just miss what it was and I

Now you're always on my mind
Never thought that I'd fall behind
Hell, what happened to the time
Guess you'll just stay a friend of mine

You were my heaven on, heaven on high
You were my blue sun, perfect skies

Flashing white streaks, pulsing veins
Twilight course, a moment I see your face
While we laid, both hands on my waist
Still heard your moans through the thundering rain
Yeah, I felt you then
Underneath me and
Grass-covered skin
"Just stay inside me, don't let this end"

Now you're always on my mind
Never thought that I'd fall behind
Hell, what happened to the time
Guess you'll just stay a friend of mine

You were my heaven on, heaven on high
You were my summer lust, perfect far cry
You were the last time I felt alive
You were the last time I felt alive

Now you're always on my mind
Never thought that I'd fall behind
Hell, what happened to the time
Guess you'll just stay a friend of mine

You were my heaven on, heaven on high
You were my blue sun, perfect skies
You were my heaven on, heaven on high
You were my blue sun, perfect skies
