

Nothing Left

Great American Ghost

Save me from the torment
Of this never ending lie
The futures getting darker
I'm fucking lost inside
There is nothing holding me
To the place I loved before
The world is fucking burning
All my hopes are no more

We will all die alone
We are all broken souls

I'm a liar
A fraud
A hopeless hope with a selfish cause

I can't see the purpose
In breathing one more breath
All the pain beneath the surface
Is crushing me with every step
The fucking lights are getting dimmer
I hate the person I've become
I feel nothing I feel empty
Dead to everyone

You can find me at the bottom of the river
Breathing in as the water crashes over me
You can find me at the bottom of the river
Breathing in as the water crashes over me
