

Could Be Us

Great Good Fine OK

I'm coming over to spill my heart, is that what you want?
It's getting colder, I'll keep you warm, is that what you want?
I'm vulnerable, you got me exposed, I'm feeling alone
Don't need you to promise, but baby be honest, it's all that I want

Am I gonna feel better when I speak up?
Got me so nervous when I see ya
Always changing your mind, can't keep up
Yea I'm hoping that time won't cheat us

Remember that couple we saw in the park
You asked me if we could make it that far
I didn't say it, but I felt in my heart, that could be us

Remember that feeling we had from the start
Back when love was nothing more than a thought
I want that one thing that won't ever fall apart, it could be us

It could be us

I'm getting lost, second thoughts, is that what you want?
You say you miss me. Reminiscing, is that just a front?
I'm taking the fall for all of the flaws that you let me own
I know you're the strongest, so baby be honest, it's all that I want

Am I gonna feel better when I speak up?
Got me so nervous when I see ya
Always changing your mind, can't keep up
Yea I'm hoping that time won't cheat us

Remember that couple we saw in the park
You asked me if we could make it that far
I didn't say it, but I felt in my heart, that could be us
Remember that feeling we had from the start
Back when love was nothing more than a thought
I want that one thing that won't ever fall apart, it could be us

It could be us

If you feel the same, it could be us
I can't walk away

Am I gonna feel better when I speak up?
Got me so nervous when I see ya
Always changing your mind, can't keep up
Yea I'm hoping that time won't cheat us
It could be us

If you feel the same, it could be us
I can't walk away

It could be us
