

Loose Ends

Great Northern

Don't forget to bring all your guns with you
I shoot them into the sun for you
Light the city up to try and fill you up
You say it makes you feel
Along comes the lights
Shining in your eyes
Take your steps tonight
The long roads won't lead you with light tonight

And will you sign up
Will you crack up
Will you sign up
For the long way back home?

And I will remember to show up
And I will remember to give up
And I will remember that the walls we made instead
Songs we sang instead
And the road lead with light
Lead with light
Lead with light
Lead with light
Lead with light
