Gonna Getcha

Great White

Slow blues can turn her on But she's a whole lot of woman when the band rocks on Watch her move for the backstage door The show may be over now but she's going to get some more

She says, "I know what I want, I know just what I need" She says, "You got nowhere to run, I'm going to get you" She says, "You got nowhere to hide, I'm going to get you I'm going to get you down"

Now it's late but she don't care Don't you know there's got a whole lot of waiting till we can m ake it next year She knows she knows it's hit and run But she wants to ride a rocket until the midnight sun

She says, "I know what I want, I know just what I need" She says, "You got nowhere to run, I'm going to get you" She says, "You got nowhere to hide, I'm going to get you I'm going to get you down"

She gets what she wants, she gets just what she needs She says, "You got nowhere to run, I'm going to get you" She says, "You got nowhere to hide, I'm going to get you" She says, "You got nowhere to run, I'm going to get you" She says, "You got nowhere to hide, I'm going to get you I'm going to get you down"

Get, get, get you down I'm going to get you down
