

Coming Out Of The Rain

Greek Fire

There's a blue eyed beauty in the back of my head
Covering up all the bad things you just did
I try to get up and walk but I'll settle for a crawl
And with what we did so right, it's the wrong way to fall

How far will you let this go until it's gone?
How far gone?
Here I am coming out of the rain
Coming out of the hell, coming out of the pain
I can live I can feel I can love and it's real
I can be whatever now
Here I am coming out of the rain

There's a green eyed beauty in the back of my head
Covering up all the terrible things you said
And now your sweet little lies they are stinging so real
And you keep your distance now to see if you feel

How far will you let this go until it's gone?
How far gone?
I wanna hear you say
How far will you let this go until it's gone?
How far gone?
Here I am coming out of the rain
Coming out of the hell, coming out of the pain
I can live I can feel I can love and it's real
I can be whatever now
Here I am coming out of the rain

You make me feel like I could never be loved
And like I never was good enough for you
Lost myself for you
You changed myself for you
Everything was all about you

Here I am coming out of the rain
Coming out of the hell, coming out of the pain
Here I am coming out of the rain
Coming out of the hell, coming out of the pain
I can live I can feel I can love and it's real
I can be whatever now
Here I am coming out of the rain
Here I am coming out of the rain
Here I am coming out of the rain

Here I am coming out of the rain
