

# Left For Dead

Greeley Estates

The streets are empty tonight and I  
I'm taking the long way home  
Thinking of all the things you've said  
And all the things you've said  
Soon the rain starts to fall  
Can't see anything at all  
Pull the car over, step into the night  
This rain hits my face as I cry

It's not fair I don't understand  
How it's possible you feel this way  
I tried to show you what you mean to me  
Just what you mean to me  
Hate when the things that I do make you cry  
It tears me up inside  
What can I do to make this right  
This rain hits my face as I

I'm still stuck in that same place  
And it's starting all over again  
I'm still stuck in that same place  
Where I hurt you once again

Breaking the stillness the silence has failed  
And my pulse has quickened again  
Holding on here by a thread  
Please don't leave me here for dead

Overlooking what you need the most  
Or is it just too plain to see  
These cries of neglect they fill my mind  
These cries of neglect they fill my mind  
How could I push you aside over little things  
That will never suffice  
Selfish behavior is practiced so wide  
This rain hits my face as I

I'm still stuck in that same place  
And it's starting all over again  
I'm still stuck in that same place  
Where I hurt you once again

Breaking the stillness the silence has failed  
And my pulse has quickened again  
Holding on here by a thread  
Please don't leave me here, don't leave me

Cause it's not enough to say I love you  
It's not enough to be willing to die for you  
It's not enough to smooth over the things I've done to hurt you  
There must be a way  
There's only one way  
Only one  
Breaking the stillness the silences has failed  
And my pulse has quickened again  
Holding on here by a thread  
Please don't leave me here for

Breaking the stillness the silence has failed  
And my pulse has quickened again  
Holding on here by a thread  
Please don't leave me here, don't leave me here  
For dead  
No don't leave me here  
No don't leave me here
