

Another State Of Mind

Green Day

I'm in another state, another state of mind
I wish that I could be there right next to her
Well, this road leads to this, and this one leads to that
Her voice sends shivers down my spine

These scars in my flesh
I'm bruised and I'm bloodied
Only she knows the pain
That I've been through

Talk to her a thousand miles away
There's tears in her eyes
If I make it back I'm gonna show her
She's the only one for me

Hitch a ride on the wild side
It's real hell on wheels
There's gonna be a fight tonight
I know

Another city we can't find
Another city left buried behind
As I picture her
The cities burn away

These scars in my flesh
I'm bruised and I'm bloodied
Only she knows the pain
That I've been through

Talk to her a thousand miles away
There's tears in her eyes
If I make it back I'm gonna show her
She's the only one for me

These scars in my flesh
I'm bruised and I'm bloodied
Only she knows the pain
That I've been through

Talk to her a thousand miles away
There's tears in her eyes
If I make it back I'm gonna show her
She's the only one for me
