

## Leap Year

Greensky Bluegrass

Well, I remember many years from now turned out we misled someh  
ow

They say the good ones all meet up in the end

But I'm not headed that way

Nothing is over that hasn't begun

There's a life waitin' for you, baby turn away and run

Completely invested and entirely tied

But content to unwind

How can one more day make a year so long?

Like I'm falling down with my shadows gone

Gonna need to take a leap of fear

I don't sleep sober and sometimes I can't see

There's a river of sadness like whiskey in me

It's not my actions that bring me shame

Only myself to blame

How can one more day make a year so long?

Like I'm falling down with my shadows gone

Gonna need to take a leap of fear

Afraid of living without the sorrow

Worried Joy will lose all of it's power

Cut off at the knee is nothing to stand on

Force my envy red

How can one more day make a year so long?

Like I'm falling down with my shadows gone

Gonna need to take a leap of fear
