This sound

This sound is physical
It's very physical
But metaphysical and mystical
And though we're not in your peripheral
Would find it difficult to miss you

This sound is physical
It's very physical and literal
But metaphysical and mystical
And though we're not in your peripheral
Would find it difficult to miss you

This sound is sensual
And plentiful
Alchemical
It's medicine and medical
Like medicine
Now open wide and let it in

This sound is sensual
And plentiful
Alchemical
It's medical
Like medicine
It's medicine
Now open wide and let it in

This sound

Now open wide and let it in
This piece of medicine
You know your soul needed it from the very beginning
And now your loosening
You hear the truth in it
Your little toes telling you you got to move to it and groove to it
Said groove to it
You gots to groove to it
