

Never So Far

Greg Brown

Too many miles there between us
Too many kisses, nowhere to go
Don't wanna moan, don't wanna fuss
I'm calling you up just so you'll know

You are never so far that my love can't find you
You're never so far I can't see your face
We are never so far, let me remind you
We're never so far from our loving place

Love is a gift, life is a journey
We'll get 'em together some sweet day
When we're apart it's all such a yearning
But listen now, baby, to what I say

You are never so far that my love can't find you
You're never so far I can't see your face
We are never so far, let me remind you
We're never so far from our loving place

I can feel your hand in mine right now
I feel your sweet love in my bones
Let's not cry, let's not fight now
Love will hold us even when we're alone

You are never so far that my love can't find you
You're never so far I can't see your face
We are never so far, let me remind you
We're never so far from our loving place

Never so far
Never so far from our loving place
Never so far
