Outside money burnt my hometown Like a moth in a flame All you got to do is travel around And you'll see that everywhere it's the same

One big town
We're living in one big town
One big town
Dying in one big town
World around
The whole world around

We hear the same song, see the same show Under the shadow of the end--Fear for our children wherever they may go As we watch the red, red blood flow again

In one big town
We're living in one big town
One big town
Dying in one big town
World around
The whole world around

Just one big town
The whole world around

And it growns unknown like a cancer
All across the fruited plain
Spin the wheel for an answer
But you never know what's in the wind and rain

In one big town
We're living in one big town
One big town
Dying in one big town
World around
Just one big town
The whole world around

Just one big town
We're living in
Living in one big town

We're dying in one big town The whole world around Whole world around

Just one big town
