

# Think About You

Greg Brown

Gonna turn off the radio, control nothing remotely  
Ain't gonna rent me no video, disconnect the telephone  
I gotta be all alone, and just think about you

I can smell your warm neck, I can hear your low laugh  
I see the way you come to me, feel the muscle in your strong back  
I get the good blues when I think about you

I'm a-working on a' up-link, I'm sending out a signal  
Hope you can pick it up on your sweet receiver  
Hope you can feel me too when I think about you

and I'm gonna think a long time  
gonna think a long time  
and I'm gonna think a long time  
think a long time

When I build my little cabin with a sky window above the bed  
So I can sleep with Orion in the middle of the winter  
Maybe you will visit me, we can cook a slow soup

Gonna ease down easy deeper in the dream I'm dreamin'  
It's like your arms are around me, like sinking in a hot bath  
even when I'm sleeping, I'm gonna think about you

Gonna turn off the radio, control nothing remotely  
Ain't gonna rent me no video, disconnect the telephone  
I gotta be all alone, and just think about you
