Save Yourself

Greg Holden

Here comes a moment, now it's all changed
And now I realize what I've gotta say
But if I say it, will you hear me?
'Cause nothing good is ever easy
I've been released but I can't let go
So I keep searching for the high road
And it might look perfect but believe me
Nothing good is ever easy

Don't keep looking back, losing track
Never seeing clearly
Lost in this or that, it's a trap
Gotta get out

And try to save yourself
So you can find a way to save someone else
It won't make any difference if we don't all help
We all need help
You've got to save yourself
So you can find a way to save someone else
It won't make any difference if we don't all help
We all need help

Here comes a moment, did it all change?
And now that you've tried it, did it all change?
And I've got a feeling you believe me
No one said it would be easy

Just keep moving on, staying strong
Let go of your mistakes because they're dead and gone
Holding on is never gonna help

And try to save yourself
So you can find a way to save someone else
It won't make any difference if we don't all help
We all need help
You've got to save yourself
So you can find a way to save someone else
It won't make any difference if we don't all help
We all need help

And try to save yourself
So you can find a way to save someone else
It won't make any difference if we don't all help
We all need help
You've got to save yourself
So you can find a way to save someone else
It won't make any difference if we don't all help
We all need help
