

# Curious

Greg Kihn Band

I was walking through the valley of rejection  
I never had a true love by my side  
I didn't even know the right direction  
Then I took a look at your disguise

I got curious, curious, curious about you  
I got curious, curious, curious about you

Baby, there was once a time way before I met you  
When I had the whole world in my hand  
The little things always seem to get you  
Usually they call me a cautious man, but

I got curious, curious, curious about you  
I got curious, curious, curious about you

I got curious, curious, curious about you  
I got curious, curious, curious about you

I got curious, curious, curious  
I got curious

I wanna know your complete family history  
Goin' back to your great great great granddaddy...
