

## You Know I Do

Greg Puciato

I told you wait and see  
But on my mind I kept you next to me  
A space in time  
We were a state of mind

Warm, so I kept you cold  
We're hard to find  
Fear makes us force control  
And waste our time  
Death was a state of mind

Now while I wait and see  
You're on my mind  
I keep you next to me  
You wait for a time  
Love is a state of mind

And when we touch the night turns stars to open doors  
I wish I could know what we're waiting for  
I really don't know what we're waiting for

As if the earth could hide the waves beyond your shores  
We really can't hide what we're here for  
I really don't know what we're waiting for

And when we're talking I hear thoughts that have no words  
I think I forgot how to say more  
I just need you right now to say more
