

Tipping toeing down your spine when everyone's around
Kiss me hard forget them judging eyes
Who cares about what is to come no I don't fear the night
Let's show em what it is to be alive

If nothing is for keeps, can I keep you just for a minute?
I don't know what's real but I really wanna feel you now
Get a little too close can I stop your heart for a moment?

If I don't even care, is that really such a crime?
If I don't even care, is that really such a crime?
If I don't even care, is that really such a crime?

Shed your layer lay with me let's waste a little time
And if it all burns down well that's just life
Oooooo we're all going anyways
So let's let it out too loud

If nothing is for keeps, can I keep you just for a minute?
I don't know what's real but I really wanna feel you now
Get a little too close can I stop your heart for a moment?

If I don't even care, is that really such a crime?
If I don't even care, is that really such a crime?
If I don't even care, is that really such a crime?
If I don't even care, is that really such a crime?
