

RADAR

Grey

Simmer down, simmer down
Your head is on fire, let me put it out
Bite your tongue, bite your tongue
You worry 'bout things I haven't done

I ain't going anywhere but by your side
By your side is where I wanna stay
I got tunnel vision, baby, you're the light
Don't fade away

You're the only one on my radar
You're the only one in the room
You don't gotta worry, there's no one else
There's no one else but you
You're the only one in the picture
You're the only woman I choose
You don't gotta worry, there's no one else
There's no one else but you

No one else but you
Ooh-ooh, ooh-ooh, ooh-ooh, ooh-ooh, ooh-ooh, oh
No one else but you
Ooh-ooh, ooh-ooh, ooh-ooh, ooh-ooh, ooh-ooh, oh

Underground, underground
You're feeling so low, let me take you out, yeah
Can't get through, through to you
You worry 'bout things I would never do

I ain't going anywhere but by your side
By your side is where I wanna stay
I got tunnel vision, baby, you're the light
Don't fade away

You're the only one on my radar
You're the only one in the room
You don't gotta worry, there's no one else
There's no one else but you
You're the only one in the picture
You're the only woman I choose
You don't gotta worry, there's no one else
There's no one else but you

No one else but you
Ooh-ooh, ooh-ooh, ooh-ooh, ooh-ooh, ooh-ooh, oh
No one else but you
Ooh-ooh, ooh-ooh, ooh-ooh, ooh-ooh, ooh-ooh, oh

Days apart are months to you
But I'll be back before we're through
It's funny, you don't think I feel the same, oh
Know you feel I've let you down
A million times, I've come around
But me, you're the only thing to blame

You're the only one on my radar
You're the only one in the room

You don't gotta worry, there's no one else
There's no one else but you (Yeah)
You're the only one in the picture
You're the only woman I choose
You don't gotta worry, there's no one else
There's no one else but you (Yeah)
