

Calm me down, anxious little gutter fever
Cold world sounds tumbling through my head again

Break apart the Earth
Desperate thoughts they never leave
Break apart the Earth distaste for all things

Break apart the Earth
Desperate thoughts they're never leavin'
Break apart the earth distaste for all things
My distaste for it all

You feel it in your bones
Standing in the water taking stones from the riverbed
Smell it on her clothes
It was the calm before the storm was ever there

Left out in the rain
Honestly I never knew you
Left out in the rain
Honestly I never thought you were

Helpless
I just want to be the one
Wasted
Over and over again
Helpless
I just want these days to stop

Oh, this itches
I'll just cut it out
Let me dig a little deeper inside the skin
Oh, this itches
I'll just cut it out
I've been looking for your cancer
Where do I begin

I'll just cut it out
I'll just cut
