

Shadows

Grieves

Thinking I don't feel alright
Screw loose in my head I feel so dead until I get it right
You know we coming for it
All we gon' see the light
Until then I'm just in night

Looking at the sky above
I fly away, better day when I feel some love
You know we coming for it
All we gon' see the light
Until then I'm just in the night, night

Until then I'm just in the night
Until then I'm just in the night
Until then I'm just in the night, night

I close my eyes, so I can't see
Our world collapse into this idiocracy, so I write
I'm thankful for, what I've explored
Now we go down down down till we sink to the ocean floor
We run around, head to the ground
I conversate still I don't ever get a sound, but I try
What do you mean, head to the screen
Now we go down down down, I just can't take it no more

Until then I'm just in the night
Until then I'm just in the night
Until then I'm just in the night, night

I, I, I got diamond flow
Game major with a mind like a minor note
Think deep like a miner though
I'm a dinosaur
Been around since the time before
I'm, I'm, I'm all in my zone
Cloud on my tongue got a mind of its own
Donnie was out his element
I was like chill
Walter just shut up and bowl
Vibe on a nice wave
Staying on point like a knife blade
I'm sipping on something that feels like it might have a bit of the essence
of night shade
A flicker of light
I found what I needed and kept it in sight
You keep on looking behind you
I was in line to send it all in to the...

You keep on looking behind you
I was in line to send it all into the...

Until then I'm just in the night...
