

# Put Me Through Hello

Griffen Palmer

I swear I'd be over you by now  
If I went and threw this damn thing out  
Every time it rings or lights up  
It messes my whole life up  
I try to shake your memory  
But, baby, as long as you keep  
Goin' out on a Friday night  
It's just a matter of time 'til you put me through

"Hello, are you out? Are you up?  
Saw your friends at the bar, started thinkin' 'bout us"  
You know that it's late, swear you ain't had a drink  
I should know better 'cause every time that you say  
"I miss you" just so I say it back  
Droppin' them "how you beens" and "remember that's"  
I should be tellin' you, "Hell no," but I know  
I'm gonna pick up the phone and let you put me through "hello"

I guess I do this to myself  
Can't even blame nobody else  
I could delete your number  
Let a broken heart recover  
It don't matter if I leave this house  
Put miles between me and this town  
I'll never get too far  
'Cause wherever you are, you're gonna put me through

"Hello, are you out? Are you up?  
Saw your friends at the bar, started thinkin' 'bout us"  
You know that it's late, swear you ain't had a drink  
I should know better 'cause every time that you say  
"I miss you" just so I say it back  
Droppin' them "how you beens" and "remember that's"  
I should be tellin' you, "Hell no," but I know  
I'm gonna pick up the phone and let you put me through "hello"  
And let you put me through "hello"

If you're gonna leave me, then leave me alone  
If you had enough, then just let me go  
Girl, don't make me believe it  
'Cause I know you don't mean it when you put me through

"Hello, are you out? Are you up?  
Saw your friends at the bar, started thinkin' 'bout us"  
You know that it's late, swear you ain't had a drink  
I should know better 'cause every time that you say  
"I miss you" just so I say it back  
Droppin' them "how you beens" and "remember that's"  
I should be tellin' you, "Hell no," but I know  
I'm gonna pick up the phone and let you put me through "hello"  
And let you put me through "hello"  
And let you put me through "hello"
