

## Decoy

Grizfolk

Where were you when we were waking up from the dreams that we are  
Have you had enough of feeling like you're so far apart  
I said are you living the words that come from your heart  
Your heart, your heart

Just another decoy  
Nothing like the real thing  
Everybody falls for fools gold  
But I won't fall again  
Just another decoy  
Living to pretend  
Can we lose these lies that we hold  
Or is this how it ends  
Is this how it ends

There's a shadow standing next to me wherever I go  
And the more I shine a light on it the less that I know  
I'm longing for a place where I can lay low  
Lay low, lay low

Just another decoy  
Nothing like the real thing  
Everybody falls for fools gold  
But I won't fall again  
Just another decoy  
Living to pretend  
Can we lose these lies that we hold  
Or is this how it ends  
Is this how it ends

Just another decoy...
