

Now That I Know

Grizfolk

I really wish I didn't know
For a million different reasons
I just wanted to get the notes
I didn't need to hear the thesis

If only you could take it back
Take it from me
I know we can't erase the past
Change the story

Now that I know, Now that I know
I'll never look at you the same way
Look at you the same way

Now that I know, Now that I know
I'll never look at you the same way
Look at you the same way

Right now I'm sinking like a stone
I can't climb out of this condition
I need a way to turn it off
My saving grace superstition

If only you could take it back
Take it from me
I know we can't erase the past
Change the story

Now that I know, Now that I know
I'll never look at you the same way
Look at you the same way

Now that I know, Now that I know
I'll never look at you the same way
Look at you the same way

I really wish I didn't know
Some things are better kept a secret

Now that I know, Now that I know
I'll never look at you the same way
Look at you the same way

Now that I know, Now that I know
I'll never look at you the same way
Look at you the same way
