

Day When the Computer Done

Groundation

So soon it come, so soon it will change all things
But for now, we bank, log on, in hopes that we will find
Watching numbers steadily climb
Given a piece of plastic to ease our minds

And man a go run, the Earth will move
When everybody turn up in the wrong damn mood
Then the Rastaman come, searching for the truth
Man's destiny is not in A.I., it's in you

Day when the computer done it done yeah
Where all the money gone?
Day when the computer done it done yeah
Where all the money gone?

They say it wrong to criminalize what they say and post
So false information spread like fire while wind a blow
Why man them wicked?
Why them so artificial in them testimony
So, so wicked fi true
You have to be good, have to keep strong
Mind, body and soul

In this life of comforts and ease
See mankind do as they please
The people slumbering
All resting on
Technical advances
So, tomorrow's coming faster and faster!

So soon it come, so soon it will change all things
But for now, we bank, log on, in hopes that we will find
Watching numbers steadily climb
Given a piece of plastic to ease our minds

The time will come, as the market improves
When everybody fix up in nice shirt and shoe
And as we digitize our life, we are mindful of the truth
Individuals have more power than nations do

Day when the computer done it done yeah
Where all the money gone?
Day when the computer done it done yeah
Where all the money gone?

They say it wrong to teach him about himself and what he knows
It will come to pass on him just like dem system broke
Why man dem wicked?
Why them so artificial in them testimony?
So, so wicked fi true
Rivers of pleasure, suddenly falter, where will man go?
