Not So Simple

Groundation

If there is an answer for what you see
Through all our misfortunes we find it necessary

More education for the youth
Health care to comfort thee
Never abandon balanced thought
In some mask of apathy

Life is crucial you've always know
But the best direction is not easily shone

With no one to guide you from the start
Fame will confuse thee
Never abandoned godliness
In this game of vanity

We were three with Nebuchadnezzar
And you too may suffer like Joseph

It's a constant reminder
My grandma always said
"You'll never have to worry
No you never have to fret
Things are not that bad"
As you rock that cradle
Rock that cradle

You will never, never know a failure
If you could never see what wrong you did no way
Come fire dread, come fire dread come

It's not so simple
Don't you know
You must have patience
Or the story goes

Eyes on Judah through the night
No faith to comfort the
All will abandon him tonight
In bold hypocrisy

Here I am
