

One but Ten

Groundation

In life I see and know
Show love and only goodness can come
Some lessons you will repeat
What you sow is what you will reap

There's not one but ten of them
They will fight wars to contend it
One super power to control them
Yes, our world is full of problems

But we are here to solve them
Yes, our world is filled with problem
But we are here to solve them

Still in life I do believe
In every tongue, language, and speech
There is a word you cannot defeat
And to this we must repeat

There was once 9 now 8 of them
Numbers that keep on subtracting
Looking as this is maddening
Can't we see what's happening?

Negative thoughts we're attracting
As the poles keep slipping
Over land masses drifting

There was once one but now ten of them
They will fight wars to contend it
One super power to control them
Yes our world is full of problem

But we are here to solve them
Yes, our world is full of problems
But we are here to solve them
