Group 1 Crew

Come wake me up
'Cause I've been stuck in sleepmode
I just need a download
Recharge me heart
I need something to live for
I just need a download

I got my mind plugged in, gettin the good that you got to give me
Cause I'm limited to only me knowin enough to live
But my hard drive crashed and smashed all that I had
Had me like dang dang da diggy dang dang
But then I cheered up, downloaded everything that I needed
Negative files deleted, dreams never depleted
Standin up on my desktop, ready to rock rock
Like, oh my gosh, oh oh oh my gosh
Every now and then I'm disconnected and have to restart my mission
It's never you, it's a glitch that happens when I never listen
But I'm just a click away, and I know you can reconnect me like
(Click, click click click, click, click click, click)

Come wake me up
'Cause I've been stuck in sleepmode
I just need a download
Recharge me heart
I need something to live for
I just need a download

Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download

Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download

Yeah, we been infected, a virus, tryna control our iris
And keep us seein pinwheels spinning, no no progress
Stuck on a page of life that's bogged down

But you ain't gotta stay there
Reload outta sleep mode, keep it beast mode
You ain't ever gotta freak mode, peep the key code
Gotta love it when it's free mode, ya that me mode
Unlocked every level, call it call it cheat code
And you told us why you did it, the love you have for your kids it
Amazes the harshest critic who never believe you did it
But soon it's the newest update, killin the silly gimmicks
Download until you finish

Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download

Gimme what you got, gimme what you got download

Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download
Gimme what you got, gimme what you got download

I could stay old me, old scene
The OG, the cold me who never understood you know me
It's lonely
Ain't gotta let fear control me
But get a download, new soul, the 2.0 me
And we ain't gotta have an update
The price paid in full weight for full grace
Beyond great, Beyonce, we upgrade
My mind state is blind faith, yeah

Come wake me up
'Cause I've been stuck in sleepmode
I just need a download
Recharge me heart
I need something to live for
I just need a download

Come wake me up
'Cause I've been stuck in sleepmode
I just need a download
Recharge me heart
I need something to live for
I just need a download
