

# Sometimes You Know

Gryffin

Save  
Save all of your doubts for later  
Stay  
All I know is I want you here by my side  
Cause  
I already know it's you and I

Oh  
I don't wanna

Wait  
Wait another second for your love  
Stay  
I don't need no time to figure out  
Why  
Why I can't get you out of my mind

Sometimes you know the feeling right away  
I've got a million words but can't explain  
Why I fell hard so instantly  
When I don't know your name

Somebody told me - wake up and learn from mistakes  
Got a million words but I still can't explain  
Why I feel love instantly  
And I don't know your name

Hey  
I don't even know you but I'll  
Stay  
I wanna hear everything about your history  
And how you've been missing me  
Oh  
And I know yeah I know yeah I know that we are meant to be  
Even though I don't know you we've got chemistry  
Oh

Hey  
I already know it'll be you and me  
Oh

Sometimes you know the feeling right away  
I've got a million words but can't explain  
Why I fell hard instantly  
When I don't know your name

Somebody told me - wake up and learn from mistakes  
Got a million words but I still can't explain  
Why I feel love instantly  
And I don't know your name
