# Let Me Know

**GSoul**

Let me know
What I need to know to get to you
And go to places you always wanted to go
With no doubts or no fear but with love we go

Let me know
I don't wanna keep assuming where you go
To find your smile back on your face when you're alone
Just give me the list of things you wanna see

Whenever you lonely, call me, trust me
I'll be right where you need me to be
As corny as this song might be
Just want you love me the right way
Just as much as I need you, baby
When you're lonely

Let me know
I put my pride aside so me and you can go
Go find your smile back on your face when you're alone
With no doubt or no fear just with love we go

Whenever you lonely, call me, trust me
I'll be right where you need me to be
As corny as this song might be
Just want you love me the right way
Just as much as I need you baby
When you're lonely

Under the stars till the dawn
We look for a place to just dance all night long
Trust me and follow my lead
We'll make this love till the sun's up

Whenever you lonely, call me, trust me
I'll be right where you need me to be
As corny as this song might be
Just want you love me the right way
Just as much as I need you, baby
When you're lonely
