Guided by Voices

You just said it, now it's gone
You just meant it to be wrong

Look at you done being down
Always hit the ground

It's not that difficult
It's not judicial
It's not impossible
It comes without something

It comes with the return
Chalked up to experience
It spins on the table
It's [?] than stylus
It spins it around now
For every last drop of blood

What do you replay
How you're programmed
What is your number
How do you calculate
You tattletale on classmates
In guess who t-shirts
In guess what jackets
And guess what happens now
