

Alien Apes

Gungor

We are the alien apes
We've come a long way
We keep on evolving
We are the alien apes
We've come a long way
We keep on evolving

We come from a people with scars, with scars
Cause life on our planet is hard; it's hard
You see the horizon
That small and yellow star
It's there where our home is
But we've torn it all apart

We are the alien apes
We've come a long way
We keep on evolving
We are the alien apes
We've come a long way
We keep on evolving

Our bombs are too strong now
We won't last through the night
Unless you can teach us
Come make it right

We are the alien apes
We've come a long way
We keep on evolving
We are the alien apes
We've come a long way
We keep on evolving

We are the alien apes
We've come a long way
We keep on evolving
We are the alien apes
We've come a long way
We keep on evolving
