

Dark All Day

GUNSHIP

As he takes from me my last breath, inhale
I'm picking up the scent

What a hell of a feeling
It is dark all day
But there is something in the sky that glows
What a hell of a feeling
With such a brilliant mind
Can you feel those chemicals in the air tonight?

I will see you on the other side
I am your night girl, rip my heart out
Darkness falling yet another night
Come on Lost Boys, let's stay alive

What a hell of a day to embrace disorder
And there is something in your eyes that burns
Light up, drag the river
Can you see there are chemicals in the air tonight?

I will see you on the other side
I am your night girl, rip my heart out
Darkness falling yet another night
Come on Lost Boys, let's stay alive

Let's fly

I will see you on the other side
I am your night girl, rip my heart out
Darkness falling yet another night
Come on Lost Boys, let's stay alive

Goodnight my Lost Boys
Thou shall not fear
Goodnight my sweetheart
