

Nuclear Date Night

GUNSHIP

We dream of contact when we fall asleep
Getting acquainted on repeat
Optics run monochrome when it starts to get deep
Volatile neurons in ultra-high frequency

You're so delicious
Distorting my DNA
Veins pumping with gasoline
You're sliding my feet away

Nuclear date night
(So visceral)
Where do we find it
(Synthesised)
Our hero youth
Dream together, we die together

Break the fixation on reality
There's a killer in you but no victim in me
Queen of the town, King of the street
Sleep when you're dead
Come in through this door with me

You're so delicious
Destabilise gravity
Turning heads and breaking necks
That optimised symmetry

Nuclear date night
(So visceral)
Where do we find it
(Synthesised)
Our hero youth
Dream together, we die together

Alcohol and dopamine the cocktail forever
Body heat and sanity under pressure
Metabolise, fantasise
The medium of exchange
This is the point of no return now
We are at the centre of the hurricane

Are you a fuckin' legend yet?

Night time is the right time for love
We'll party 'til we die
Chemical I just can't get enough
We'll party 'til we die
Night time is the right time for love
We'll party 'til we die
Systematic attack of the heart from above
We'll party 'til we die

Nuclear date night
(So visceral)
Where do we find it
(Synthesised)

Our hero youth
Dream together, we die together
