

# Weaponised Love

GUNSHIP

Perfect body, perfect legs  
Cosmetic addiction, modification  
The woman of a thousand faces  
Let's get invasive, let's get real messed up  
This is now weaponised love  
Sharpen your faith, the trip is beginning  
Superficial damage, fucking cute scar  
Spark a smoke, repair turned on  
For something this deep I've been waiting forever

Inject this party right  
To the head, you're my drug  
I can't break the need for weaponised love  
Give it to me, come on give me some more  
You got me wrapped up, pinned down on the floor

Perfect body, perfect ten  
Alienation, separation  
The creature of a thousand faces  
Let's start the damage way past no return  
Automatic dominance  
A monster of war, white hot intuition

Inject this party right  
To the head, you're my drug  
I can't break the need for weaponised love  
Give it to me, come on give me some more  
You got me wrapped up, pinned down on the floor

Superficial damage, fucking cute scar  
Spark a smoke, repair turned on  
For something this deep I've been waiting forever  
To the head, you're my drug  
I can't break the need for weaponised love  
To the head, you're my drug  
I can't break the need for weaponised love  
To the head, you're my drug  
I can't break the need for weaponised love  
To the head, you're my drug  
I can't break the need for weaponised love
