

Black Balloon

Guster

Black balloon
You pull the air out of this room
Up to no good
But I'm not frightened, not of you
You, black balloon
The earth, sun, and moon

I'm not worried about changing
It's what we're put here to do
Something is better than nothing
I'll go with you
If you'll ask me to

We'll fly
I'm beside you, black balloon

Black balloon
I'm not scared of what you do
'Cause I made you
Were we ever understood?
We, black balloons

I've been waiting for changes
It's what we're put here to do
Someone is better than no one
So just ask me to
And I'll go with you

We'll fly
We'll fly
I'm beside you, black balloon
