

## Where Was I?

Guttermouth

Well, country's in the red  
Soon we'll be dead  
No life, not even a flower  
Cause atomic power  
Scares the shit out of you  
There's nothing you can do  
Undecided men  
Bout a war you can't win  
Hey, who would want to win the damn thing anyway, right boys?!

Children turn green  
The flowers die  
All the people are gone except I  
The atom bombs have exploded near  
Where was I if I wasn't here?  
Atomic was one way out  
Nuclear was the final bout  
Atomic war can destroy our race  
Leave the earth in all but waste

But, where was I  
When the trouble started?  
Where was I when the two sides parted?  
Where was I if I wasn't here?  
Cause the atom bombs have exploded near  
But nothing's happened to me so...
