

Afterlife

Guy Sebastian

Darling, my heart overflows
The more that I get to know
Everything about you
Somehow there's still room for more
Like a desert flower blooms
There's nothing we can't get through
Every day I wake up a little more in love with you
And I don't know how
We're still on a roll, we ain't slowing down

Baby, this love will never take a last breath
We're still going strong, you know we ain't done yet
You are my end from the start
Even when everything's dark
We're like a light that never goes out
I ain't doin' it right unless you know now
That you are my end from the start
You're my then, my now, my afterlife

We collided you and me
More than just destiny
A force that's so magnetic
Bound together from the start
Like forever written in the stars
Just look up, baby, that's where we are
Even time can't tear us apart

Baby, this love will never take a last breath
We're still going strong, you know we ain't done yet
You are my end from the start
Even when everything's dark
We're like a light that never goes out
I ain't doin' it right unless you know now
That you are my end from the start
You're my then, my now

Oh baby, this love will never take a last breath
We're still going strong
No, we ain't even done yet
Oh baby, this love will never take a last breath
We're still going strong
No, we ain't even done yet

Baby, this love will never take a last breath
We're still going strong, you know we ain't done yet
You are my end from the start
Even when everything's dark
We're like a light that never goes out
I ain't doin' it right unless you know now
That you are my end from the start
You're my then, my now, my afterlife
