

Something

Guy Sebastian

In the morning when I wake up
Will you still be here?
Messy hair, no make-up
Say you will, say you will
I know a both of it'll burst now
This ain't a killer talking
I think we're on to something
Something real, something real

All this touching, I'll be rushing
Let's not think too much
I think we might be on to something
Or maybe it's more than just

Something, something
Something, something
What if it's more than
Something, something
Something, something
What if it's more, what if it's more than

Let's make some memories tonight
We'll make it last forever
Bodies under this moonlight
Go again, let's go again
And if I only get one shot
You're getting all that I've got
I'm on, let's do this
Make it rain, make it rain

All this touching, I'll be rushing
Did we drink too much?
I think we might be on to something
Or maybe it's more than just

Something, something
Something, something
What if it's more than
Something, something
Something, something
What if it's more, what if it's more than

Oh, yeah
What if it's more than
Oh, yeah
What if it's more than something
What if it's more than

What if it's more than something, something
Something, something
Something, something
What if it's more
It's gotta be more than
