

We Made It

H.E.R.

I've been really feeling like
Oh it's been a long time
It was early mornings, late nights
We was praying for the sunshine
Oh and this whole time I been at it
If you're on the outside, you won't get it
Can't break me I, won't let it
Won't let it
A now I feel like a milli
I hope you rockin' with me
Before we was hot like the summer
Before the wrist was chilly
Before conversations on the terrace with a view
Ooh you know I always wanted you
Ooh you know I always wanted to
Wanted to, yeah

All those nights
Hoping that we find it
Looking at the sky
Like thank god that you're with me
You're with me
Running red lights
And following the signs
It's been a long ride
And I just can't believe
Can't believe we made it

We made it
Celebrate it for the one time
No matter where this all goes
Ima always be on mines
And I know I'll always have you, yeah
Cuz I did what I had to
The moment it was past due
It ain't magic, it ain't
They said I won't come up with the family
And cop a couple Grammy's
All the things they said that I can't be
Revenge taste just like candy yeah
And now we eating up in Paris with a view
Ooh you know I always wanted to
Ooh you know I always wanted you
Wanted you

All those nights
Hoping that we find it
Looking at the sky
Like thank god that you're with me
You're with me
Running red lights
And following the signs
It's been a long ride
And I just can't believe
Can't believe we made it

We made it

We made it
We, we
Running red lights
Lucky we survived
Those were the times
I thank God that you were with me, me
