

You'll find the way, everything will change
You'll find the way, everything will change

We'll find a way or everybody in this world's gonna stay the same

They're insane, there's no way we can change, dark days, too late

Fuck the system, stand up and listen, we will never be a part of altercation

We're just waiting for the day when you awaken staring at cracks in the pavement

It's time to take action, feels like we're being held at ransom

But I tell you, the faster we're feeding our fiction

Don't believe in jurisdiction, a... toe prescription

We give them orders, they ignore our decisions with intent to destroy our religion

Never give up, we're not gonna stop, never give up

Never give up, we're not gonna stop, never give up

You need to fucking wake up, this is a set-up

They just tighten' the noose to corrupt the youth

With twisted brutes, hoods hide the truth

Never give up, we're not gonna stop, there's no one to trust

We'll find a way, everything will change

We'll find a way, everything will change

We'll find a way or everybody in this world's gonna stay the same

They're insane, there's no way we can change, dark days, too late

Fuck the system, stand up and listen, we will never be a part of altercation

We're just waiting for the day when you awaken staring at cracks in the pavement

It's time to take action, feels like we're being held at ransom

But I tell you, the faster we're feeding our fiction

Don't believe in jurisdiction, a... toe prescription?

We give them orders, they ignore our decisions with intent to destroy our religion
