

Who said that rest comes easily?
You said that!
Might just need to be put down
Ain't standing around
Our heads in the clouds but feet on the ground
Believe me you will see me living a life freely, rise up like a wheelie
Take a step back
Look what we achieved
Straight up passion
Not about ps

Forever we aim high
On the same level, looking up at the same sky
Deep in the music, up to the waistline
So we're gonna do this
Ain't gonna waste time
There's a lot of plastic shit in this metal life
Bare bands but nothing like us five
It's our time
We're keeping it alive
Our home is where the road is so you better know this

We'll take on the world
There's no sleep tonight
So high we take flight
We touch the sky
Feeling so alive
6am still buzzing
We won't stop for nothing

6am on the tour bus carnage
That's where it started
Licking off bottles no dramas
I'm supposed to be saving my voice but i can't stop laughing
We give a hundred percent, never go half hearted
H is an army advancing our way to the target
So positive, we've already made it big, regardless

You see me on the podium
Rise above all
High like opium
Got too much heart
And this is just the start

We'll take on the world
There's no sleep tonight
So high we take flight
We touch the sky
Feeling so alive
6am still buzzing
We won't stop for nothing

We will take on the world
There's no sleep tonight
So high we take flight
We touch the sky
Feeling so alive
