

Luminosity

Hacktivist

Don't be afraid of change, we'll pave the way
And if we hit a wall we're gonna build a gate
Try stop the H, that will seal your fate
You think that your hot but we lit the flame
Imitators can't overtake
Thought that we were gonna go to waste
Got riffs for days, I rip the page
We create, they play it safe
Don't hesitate
Break down rebuild retaliate
Cant take sides two different shapes
No regrets learn from mistakes
Trust is a choice everyday we make
We're gonna kill the game, target aim
Heading for your country new songs to play
I just wanna get low till my forehead scrapes

Luminosity or shade
How can we possibly evade
Don't tell us not to be afraid we're not afraid
Got to be top of our game or we're under the blade
Luminosity or shade
How can we possibly evade
Got nothing to ashamed of you can't force us to change
And you can't keep a stopper on our rage

Hacktivist just flicked a reactor switch
Time to hit a new drastic pitch
We tried to leave our anger behind
But we keep coming back to it
Like we need it, we feed on it
Why would we wanna be freed from it
So we sat our demons down to the table
Made a deal and agreed on it
They rely on us as much as we need them
In a system that threatens to end our freedom
Harness darkness and evil laughter
It's the light at the end that keeps us breathing
We're playing, I'm swaying
There's bottles of champagne spraying
Soon as we hear those drums and a couple of strums
We run to the stage straight raging

Luminosity or shade
How can we possibly evade
Don't tell us not to be afraid we're not afraid
Got to be top of our game or we're under the blade
Luminosity or shade
How can we possibly evade
Got nothing to ashamed of you can't force us to change
And you can't keep a stopper on our rage

I'm looking round and I'm seeing man dropping like flies
I ain't had enough I ain't even in my prime on the mic
Still getting better with time
I'll dine on an emcee with fine wine it's a vibe
I'll open your mind when I rhyme

Deep on the Metal and Grime
I'm getting mine, I'm getting tours getting signed
You had a good try but now its good bye
Crash and burn, lessons learned
Bridges burnt, tables turned
The truth might hurt better stay alert
If you get a chance better put in work
When you get a taste might go berserk
Your only gonna get what you deserve
Coming up in the game don't get disturbed
I spit the verbs, hit the nerves

I spit the verbs, hit the nerves
I spit the verbs, hit the nerves

You ain't gonna see what's behind the scenes
You see the finished product lit up on the screen
For you I'm spitting these cleans
Thanks for accepting me into the scene
You ain't gonna see what's behind the scenes
You see the finished product lit up on the screen
So for you I'm spitting these cleans
Thanks for accepting me into the scene

Cloaks and daggers
Money and backstabbers
Our hopes don't matter
Just money and backstabbers
Cloaks and daggers
Money and backstabbers
Our hopes get shattered
By money and backstabbers

Luminosity or shade
How can we possibly evade
Don't tell us not to be afraid we're not afraid
Got to be top of our game or we're under the blade
Luminosity or shade
How can we possibly evade
Got nothing to ashamed of you can't force us to change
And you can't keep a stopper on our rage

Luminosity or shade
How can we possibly evade
Don't tell us not to be afraid we're not afraid
Got to be top of our game or we're under the blade
Luminosity or shade
How can we possibly evade
Got nothing to ashamed of you can't force us to change
And you can't keep a stopper on our rage
