

Turning The Tables

Hacktivist

We ain't afraid of anybody always going in fully
Ever ready never sitting on a fence
I do it for the nookie I be pulling up my hoodie
Cause I'm ready for the battle to commence
Body bags scattered everywhere
When I'm in a pit fifth gear yeah coming in hench
I made 'em wanna listen cause I'm fluent on the rhythm
Leave a mother fucking corpse in a trench

I wedge fantasia lyrics
In the faces of haters and gimmicks
Dark spirits I face in amazing places
I live fast paced on a regular basis
Mate if it's too complicated I can illustrate it
I put pain into trying to explain just how much strain I can take
It's how I ran my life since day
I designed my brain to break down limits and barriers

You could never put us in a category
So you better find another strategy
Think I'm doing this for the salary
I just want a piece in the gallery to make you believe my insanity
Switched on and I don't need batteries
Putting in a hundred percent not twenty three
Got haters and got a lot of enemies
But that's alright they ain't got the same energy

I rhyme readily heavily influenced by all I've ever seen
It's my medicine remedy
And if you ever seen me live at a show
You will know I use pure energy to tighten my flow
Mind is aligned with my soul it's heavenly
I ain't gonna die by a blow from weaponry
The vibe I provide any enemy sees
That behind my eyes there's a melody roaring

Transforming come back storming
Smash back doors in out here touring
Exploring songs recorded
New flow lifestyle never gets boring
100% I go all in, lets move forward
All around the world performing
Natural born killer I ain't gotta force it
We were the first there was no-one before this
So Shure on the mic I should get an endorsement
When I'm on stage nah don't feel awkward
I send it never get exhausted
Approach with caution
I'm on a wave that will make you feel nauseous
I never jump on the band wagon
I am the damn wagon
And I'm never ever running off course with it

Turning the tables
Unlimited horsepower never going back in the stables
Unstable
We mix genres like six hundred tangled cables

Exposing truth no fables
Realigning and rewriting time
Don't try to define it
No labels
Turning the tables
Unlimited horsepower never going back in the stables
Unstable
We mix genres like six hundred tangled cables
Exposing truth no fables
Realigning and rewriting time
Don't try to define it
No labels
Turning, the tables, tangled, no labels

Check my steeze, unique
Lyrics, unique
We need to slew streets and slew new beats
This is the future we are the new freaks
I'd like to think everybody's unique
But I have to ask why do some of you speak
Flexing like the next big thing
When it's easy to see that your future's bleak

So influential
The way I go in on an instrumental
A hundred percent yeah that's essential
If I don't spit then I'll go mental
Before this band I had potential
Imma go hard just like I'm meant to
The game is a bitch don't let it tempt you
Don't get sucked in like the rest do

Pure chemistry
When I erupt with burning flow of surging energy
People bad minded me today
But who are they anyway
Living a life where you always elevate
Everybody wanna break you down
I'm the kinda kid that don't wanna be the king
But I'm still gonna kill him just to break his crown

See what this pen does
It's fucking stupendous
So hot I pose a threat to your retinas
Stay woke but I don't wanna get no lectures
So what if you think that I should be sectioned
I'm a wordsmith using these word as weapons
I'm about that session in the studio letting out aggression

Turning, the tables, tangled, no labels

Turning the tables
Unlimited horsepower never going back in the stables
Unstable
We mix genres like six hundred tangled cables
Exposing truth no fables
Realigning and rewriting time
Don't try to define it
No labels
Turning the tables
Unlimited horsepower never going back in the stables
Unstable
We mix genres like six hundred tangled cables

Exposing truth no fables
Realigning and rewriting time
Don't try to define it
No labels
Turning, the tables, tangled, no labels
