

It's Not Fair

Haddaway

I know that we can make it with each other
If we try to find a way
But you feel like a prisoner
Under my locking key
In many different ways
You say you've got your friends
You got a place to go
And I don't have to worry
But right now
I take my chances
Swallow all my pride
I give it all a second chance

It's my life yeah
It's not fair oh

Anything you want to do
I'll be there just to support you
Anything girl just more time
I think about you day and night
If you take my love today
I give it to you every way
And when I go to bed at night
I think about my girl and I

Rejection was the first thing that told me
I really had to try again
Relations my patience
Another day another way
I didn't mean I didn't know
You never spoke you never showed
Now you're gone leaving me
When you go I just don't know

It's my life yeah
It's not fair cause

Anything you want to do
I'll be there just to support you
Anything girl just more time
I think about you day and night
If you take my love today
I give it to you every way
And when I go to bed at night
I think about my girl and I
