

# Midnight

**Hadouken!**

Satellites cutting through eons of stars  
It's all we need to guide in the dark  
Tell them that we own the night  
We're never gonna need the morning

So meet me where it's midnight  
And leave me under stars that shine so bright  
We own the night, we own the night, we own the night, we own the night  
Midnight, midnight, midnight, midnight, midnight, midnight, midnight

So meet me where it's midnight

Tell them that we own the night  
We're never gonna need the morning

So meet me where it's midnight  
And leave me under stars that shine so bright  
So meet me where it's midnight  
And leave me under stars that shine so bright
