

Posthumous Predation

Haemorrhage

Secretion of necrotic enzymes
Rancid protein decomposers
Gut-bacteria ferments the bowels
Unleash the putrefaction process

...the miracle of rot...
...postmortem spawn...
...displeased reek....
...necrosis...

Necrophagous parasites
Ovipositor of purulent festers
Maggots, pupa, larvae and mites
Colonize the mouldy intestines

...the miracle of rot...
...postmortem spawn...
...displeased reek....
...necrosis...

Putrescent decrepit organs
Corrosive stomach contents
Bacterial decomposition
Larvae hatch on carnal decay

Cadaveric fauna - starving blowflies
Voracious vermin - calliphoridae
Necrophorous fossor - dipteran larvae
Staphylinidae... let maggots swarm

Predators of dead tissue
Survive in an hostile environment
Caro data vermibus
Restless posthumous devourment
